

*Apr. 25 / Administration of William J. Clinton, 2000*

NOTE: The President spoke at 2:32 p.m. in the East Room at the White House. In his remarks, he referred to Amy Klobuchar, Hennepin County

attorney, Minnesota; and Mayor Anthony A. Williams of the District of Columbia.

## Statement on Signing Legislation To Encourage Free and Fair Elections in Peru

*April 25, 2000*

Today I have signed into law S.J.Res. 43, expressing the sense of the Congress on the importance of free, fair, and democratic elections in Peru. Transparent elections are the foundation of a democratic society.

The people of Peru will go to the polls in the near future for a second and final round to choose their president. I urge that the concerns about the electoral process underscored by the Organization of American States mission to Peru, and by the U.S. Congress in this resolution, be fully addressed in preparations for the second round. The democratic countries of this hemisphere are united in our hope that the election be conducted in a transparent, peaceful, and statesmanlike manner. Democracy is

strengthened when all Peruvians have the opportunity to debate and determine the future of Peru.

The people of the United States look forward to continuing the excellent relationship we have enjoyed with the Peruvian people and their democratically elected leaders and to strengthening the bonds that unite our countries.

WILLIAM J. CLINTON

The White House,  
April 25, 2000.

NOTE: S.J. Res. 43, approved April 25, was assigned Public Law No. 106-186.

## Message to the Senate Returning Without Approval Legislation on Nuclear Waste Policy

*April 25, 2000*

*To the Senate of the United States:*

I am returning herewith without my approval S. 1287, the "Nuclear Waste Policy Amendments Act of 2000."

The overriding goal of the Federal Government's high-level radioactive waste management policy is the establishment of a permanent, geologic repository. This policy not only addresses commercial spent nuclear fuel but also advances our non-proliferation efforts by providing an option for disposal of surplus plutonium from nuclear weapons stockpiles and an alternative to reprocessing. It supports our national defense by allowing continuing operation of our nuclear navy, and it is essential for the cleanup of the Department of Energy's nuclear weapons complex.

Since 1993, my Administration has been conducting a rigorous world-class scientific and technical program to evaluate the suitability of the Yucca Mountain, Nevada, site for use as a repository. The work being done at Yucca Mountain represents a significant scientific and technical undertaking, and public confidence in this first-of-a-kind effort is essential.

Unfortunately, the bill passed by the Congress will do nothing to advance the scientific program at Yucca Mountain or promote public confidence in the decision of whether or not to recommend the site for a repository in 2001. Instead, this bill could be a step backward in both respects. The bill would limit the Environmental Protection Agency's (EPA) authority to issue radiation standards that protect human health and the environment and would prohibit
